DASHBOARD REPORT

E-Commerce Performance & Profitability Analysis

Page-by-page findings, the business questions each chart answers, and what it means for each stakeholder

Prepared by Mathal Analytical Team

€640.42K
Net sales

19.42%
Contribution margin

10.04%
Return rate

€36.71K
Lost sales from stock-outs

Executive summary

A growing business with healthy headline margin, but profit leaks in promotions, returns and stock-outs

€640.42K	€127.65K	5,873	€109.05	19.42%
Net sales	Contribution margin	Orders	Average order value	Margin %

1

Growth is real

Quarterly sales climbed through 2025 Q3 and margin % trended up. Beauty and Fashion carry the margin.

2

Three profit leaks

Deep-discount campaigns, a €102.90K return loss, and €36.71K of sales lost to stock-outs.

3

Electronics is the pressure point

Only 2.83% margin, large return loss, and half of all lost sales value.

Who each dashboard page is for

Four pages, four audiences, each tied to decisions they own

1

Executive Performance

Primary audience

CEO, CFO, Regional heads

Decisions supported

Where to invest and which categories and markets to grow

2

Product & Customer

Primary audience

Marketing, Merchandising, Pricing

Decisions supported

Which campaigns and products to keep, reprice or retire

3

Returns & Operations

Primary audience

Operations, Customer Experience, Channel managers

Decisions supported

How to cut return loss and choose fulfilment models

4

Inventory

Primary audience

Inventory planners, Procurement, Category managers

Decisions supported

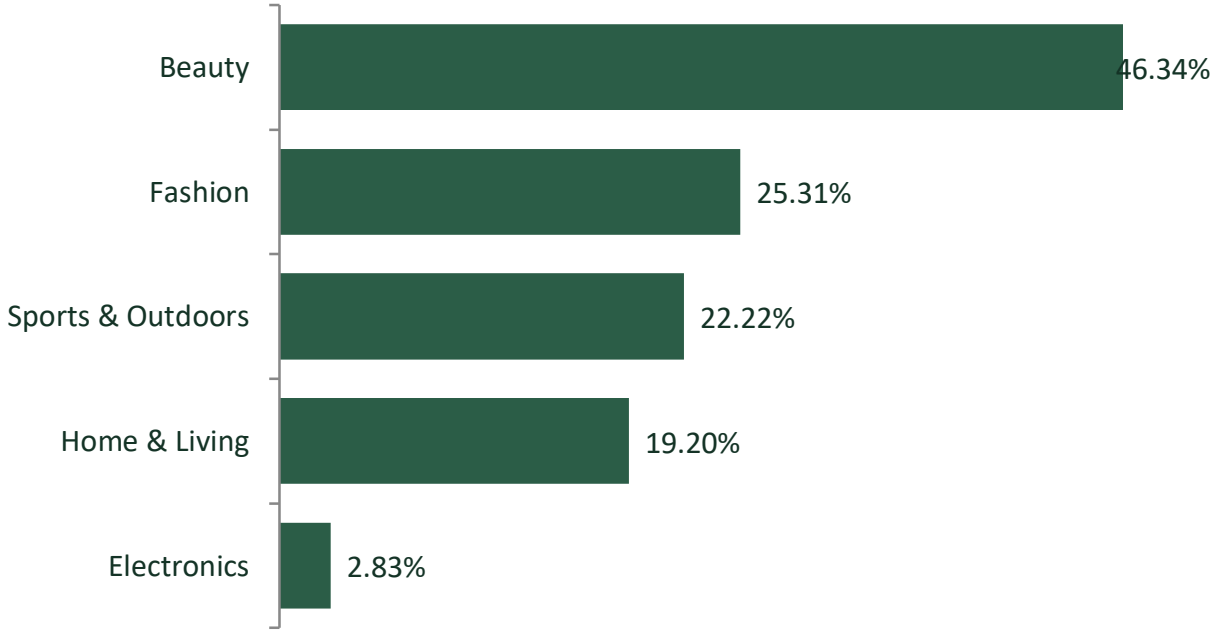

What to restock first to protect revenue

Page 1: Executive Performance

Sales have grown steadily, but profit quality depends on category and region mix

€640.42K	€127.65K	19.42%	5,873	€109.05
Net sales	Contribution margin	Contribution margin %	Orders	Average order value

Contribution margin % by category

What the data says

Healthy overall margin. €127.65K contribution on €640.42K net sales (19.42%).

Growth with better margin. Sales climbed to a 2025 Q3 peak with margin % rising; 2025 Q4 dipped and needs a check.

Category margin is uneven. Beauty earns 46.34%, Electronics only 2.83%.

Region mix matters. Western Europe is largest; Baltics and Central Europe earn roughly half the margin of other regions (approx.).

Page 1: questions each visual answers

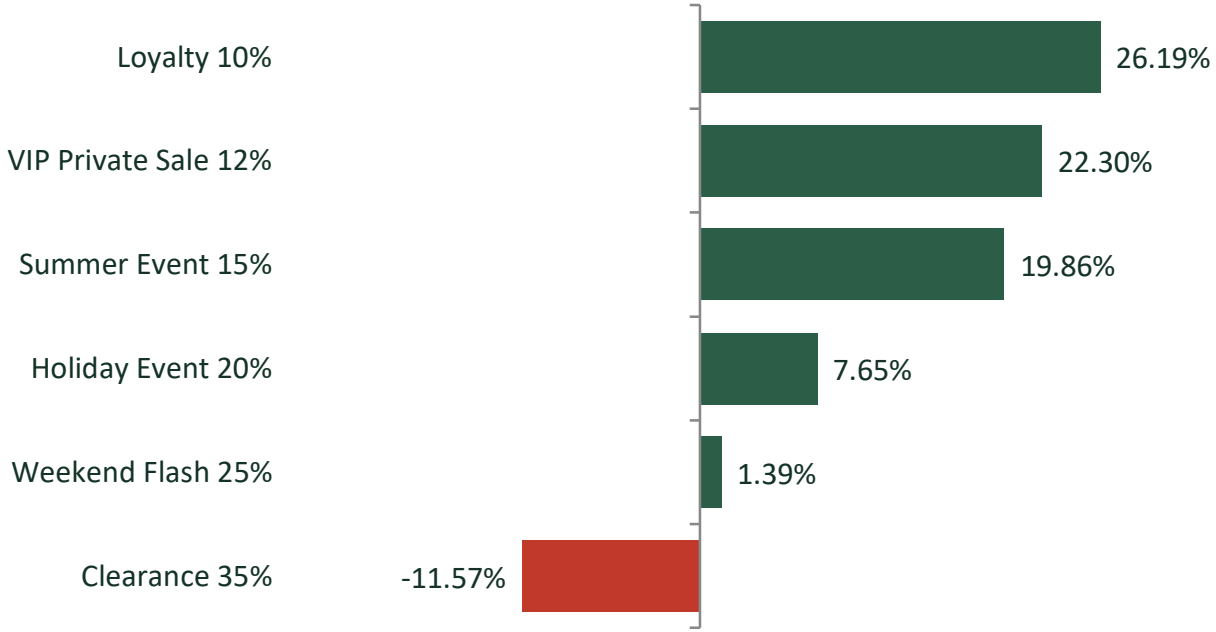

Dashboard visual	Business question it answers	Key takeaway	Primary stakeholders
KPI cards	How big is the business and how profitable is it?	€640.42K sales, 19.42% margin, 5,873 orders at €109.05 average	CEO, CFO
Net sales and margin % by quarter	Is the business growing, and is growth getting more profitable?	Sales rose to a 2025 Q3 peak; margin % trended up; Q4 2025 dipped	CEO, Finance
Net sales by department	Which department carries the revenue?	Personal & Lifestyle 67.16%, Home & Living 32.84%	Merchandising
Margin % by category	Which categories make money and which do not?	Beauty 46.34% vs Electronics 2.83%, a 43-point gap	Category managers, Finance
Net sales by region	Which markets are largest and are they profitable?	Western Europe leads sales; Baltics and Central Europe margins are weakest (approx.)	Regional heads

Page 2: Product & Customer

Promotions and a handful of tech products are eroding contribution margin

€640.42K	€127.65K	19.42%	1,099	10.04%
Net sales	Contribution margin	Contribution margin %	Returned units	Return rate

Campaign contribution margin %

What the data says

Deep discounts destroy margin. Clearance 35% loses money (-11.57%); Weekend Flash 25% keeps just 1.39%.

Loyalty and VIP deliver. 26.19% and 22.30% margin on only 10-12% discounts.

Not every product pays its way. Smart Home Elite (-0.93%) and Smart Home Plus (-2.91%) lose money; Wearables sit near 1%.

Returns hit the weakest products. Smart Home Elite has a 12.24% return rate, above the 10.04% average.

Page 2: questions each visual answers

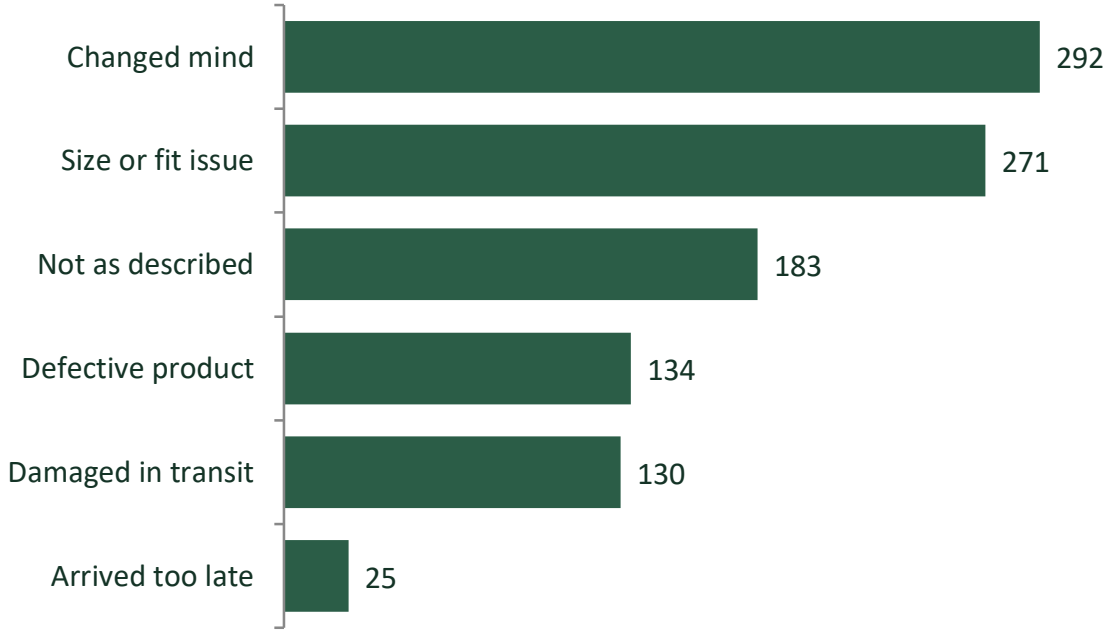

Dashboard visual	Business question it answers	Key takeaway	Primary stakeholders
KPI cards	How do returns relate to overall profitability?	1,099 units returned; 10.04% return rate against 19.42% margin	Finance, Operations
Margin % by category	Does category margin hold up when filtered by year or department?	Same ranking as Page 1: Beauty on top, Electronics at 2.83%	Category managers
Campaign contribution margin table	Which promotions make or lose money after discounting?	Clearance 35% at -11.57%; Weekend Flash 25% at 1.39%; Loyalty 10% at 26.19%	Marketing, Finance
Product contribution margin table	Which products are profitable and which have high returns?	Smart Home Elite and Plus are loss-making; Wearables earn about 1%	Merchandising, Pricing
Year and department slicers	How does performance differ by period and department?	Compare 2024 vs 2025 and Home & Living vs Personal & Lifestyle	All viewers

Page 3: Returns & Operations

Returns drive heavy losses, concentrated in Fashion and Electronics

10.04%	€102.90K	92.75%	3 days	€17.09K
Return rate	Return loss	On-time delivery	Avg. delivery time	Fulfilment cost

Returned units by reason

What the data says

Returns are costly. €102.90K return loss from 1,099 returned units.

Most reasons are fixable. Size/fit (271), not as described (183), defective (134) and damaged (130) are addressable; changed mind (292) is largest.

Fashion drives volume, Electronics drives value. Fashion has the most returned units; Electronics shows the second-highest loss (approx.).

Delivery is solid but uneven. 92.75% on time overall; 3PL lags at 88% against 96% for the owned network.

Page 3: questions each visual answers

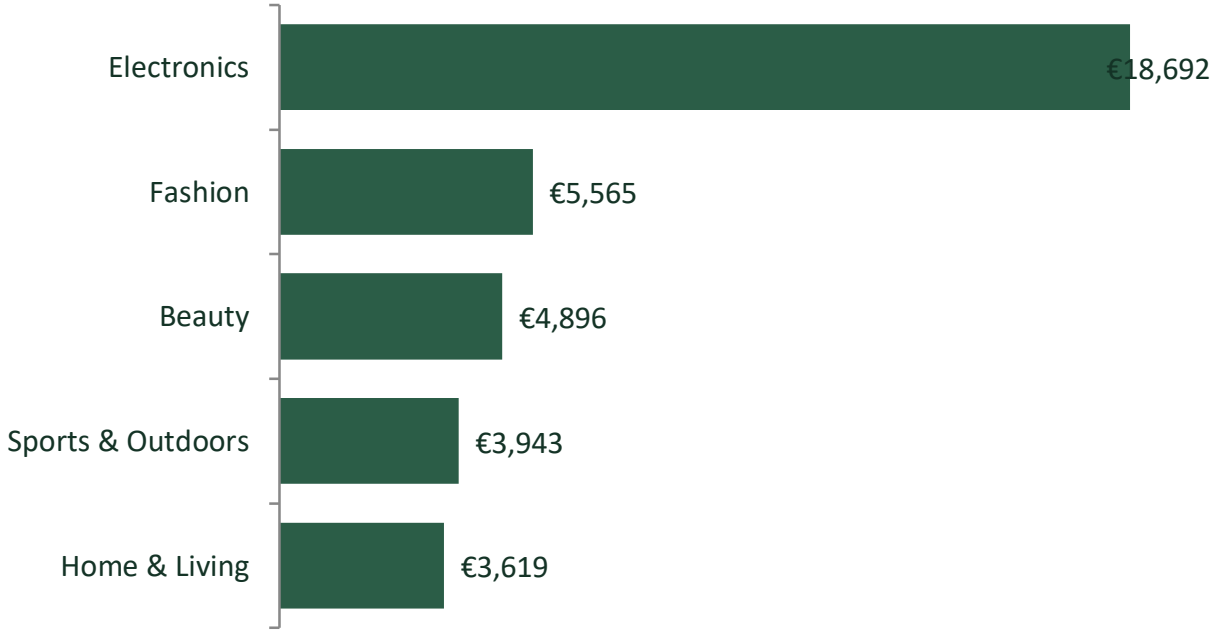

Dashboard visual	Business question it answers	Key takeaway	Primary stakeholders
KPI cards	What are returns and delivery costing us?	10.04% return rate, €102.90K loss, 92.75% on time, 3-day delivery, €17.09K fulfilment	COO, Finance
Return reasons driving loss	Why do customers return, and which reason matters most?	Changed mind (292) and size/fit (271) lead; damage and defects total 264	Customer Experience, Merchandising
Returned units and return loss by category	Which categories generate the most returns and loss?	Fashion has most units; Electronics has high loss per unit (approx.)	Category managers
Net sales by sales channel	Where do customers buy?	Website 52.66%, Mobile App 20.8%, Marketplace 16.51%, Social Shop 10.04%	Channel managers
On-time delivery by fulfilment model	Which fulfilment model delivers best?	Owned network 96%, Marketplace 90%, 3PL 88%	Logistics, Operations

Page 4: Inventory Health & Revenue Protection

Stock-outs in Electronics put the most revenue at risk

11,449	10,951	498	€36.71K
Units ordered	Units fulfilled	Units unfulfilled	Lost sales value

Lost sales value by category (€)

What the data says

4.35% of demand went unfilled. 498 of 11,449 ordered units, worth €36.71K.

Electronics is hit hardest. €18.69K lost, about 51% of the total, though at 2.83% margin the profit at stake is small.

Top lost SKUs are backordered tech. Tech Audio Elite, Audio Pro and Smart Home Pro lead the list.

Two regions lead the gap. Western Europe (155) and Baltics (109) account for 264 of 498 units.

Page 4: questions each visual answers

Dashboard visual	Business question it answers	Key takeaway	Primary stakeholders
KPI cards	How much demand did we fail to serve?	11,449 ordered, 10,951 fulfilled, 498 unfulfilled; €36.71K lost	Inventory, Finance
Ordered vs fulfilled by quarter	Is supply keeping up with demand over time?	Fulfilment tracks demand closely; widest gap in 2025 Q4 (approx.)	Supply planning
Lost sales value by category	Which category loses the most revenue to stock-outs?	Electronics €18.69K, about half of all lost sales	Category managers
Ordered units by department	Where is demand concentrated?	Personal & Lifestyle 67.46%, Home & Living 32.54%	Merchandising
Unfulfilled units by region	Which regions suffer most from stock gaps?	Western Europe 155 and Baltics 109 of 498 units	Regional heads, Logistics
Product stock-status table	Which SKUs should be restocked first?	Audio Elite (€2,913), Audio Pro (€1,905), Smart Home Pro (€1,896)	Procurement

Four business scenarios across the pages

Each scenario links evidence from the dashboard to the stakeholder who can act

Promotion profitability review

Marketing, Finance

Clearance 35% runs at -11.57% and Weekend Flash 25% at 1.39%, while Loyalty 10% earns 26.19%. Cap deep discounts and lean on loyalty and VIP offers.

Electronics turnaround

Merchandising, Procurement

2.83% margin, high return loss and 51% of lost sales. Reprice or fix quality first, and restock only the profitable SKUs.

Fashion returns reduction

Customer Experience, Merchandising

Fashion has the most returned units and size/fit is the second-largest reason (271). Improve size guides and fit descriptions.

Regional margin and fulfilment

Regional heads, Operations

Baltics and Central Europe earn roughly half the margin elsewhere, and Western Europe and Baltics hold 53% of unfulfilled units. 3PL on-time rate is 88%.

Recommended actions by stakeholder

Stakeholder	Priority action	KPI to monitor
CEO / Leadership	Set margin-first growth targets by category and region	Net sales growth, margin %
Finance	Review promo-driven margin loss and return loss monthly	Contribution margin, return loss
Marketing	Redesign Clearance 35% and Weekend Flash 25%; scale Loyalty and VIP	Campaign margin %, discount %
Merchandising / Pricing	Review Electronics pricing and cost; fix loss-making Smart Home SKUs	Product margin %, return rate
Operations / CX	Improve size and fit guidance and packaging; shift volume to stronger fulfilment	Return rate, on-time delivery %
Inventory / Procurement	Restock backordered tech SKUs by lost value; focus on Western Europe and Baltics	Unfulfilled units, lost sales value

Next steps

Suggested next steps

- Add a campaign by category margin drill-through.
- Show return rate by product and reason in one view.
- Add days-of-cover or stock-out reason to the Inventory page.
- Set margin thresholds with conditional formatting for campaigns.
