Marketing & Customer Acquisition

Power BI analysis report: findings page by page, the business questions each visual answers, and the scenarios each stakeholder can act on

Acquisition Overview | Campaign Performance | Customer Value

Samuel Sholademi · Data Analyst · October 2026

Executive summary

€640.42K
Net sales

19.93%
Contribution margin

2,200
Customers acquired

€13.58
Marketing cost per customer

Bottom line Grow profitably by re-weighting spend to high-yield channels, adding margin guardrails to promotions, and protecting the customers who generate most of the margin.

1

Spend is concentrated where value is lowest

Paid Social takes 52% of marketing cost but delivers 14% of contribution margin and only 8 of 131 VIPs.

2

Discounts buy volume at the expense of margin

Promoted sales earn 16.7% margin vs 25.4% with no promotion, and Clearance 35% loses €2.8K.

3

Value sits in a small share of customers

Loyal, Growth and VIP customers are 47% of the base but 73% of contribution margin.

Report structure and who it serves

PAGE 1

Acquisition Overview

Where do customers come from?

COVERS

Channel volume, cost, sales and margin, plus the quarterly customer trend.

CRM & Retention, Loyalty, Executive team

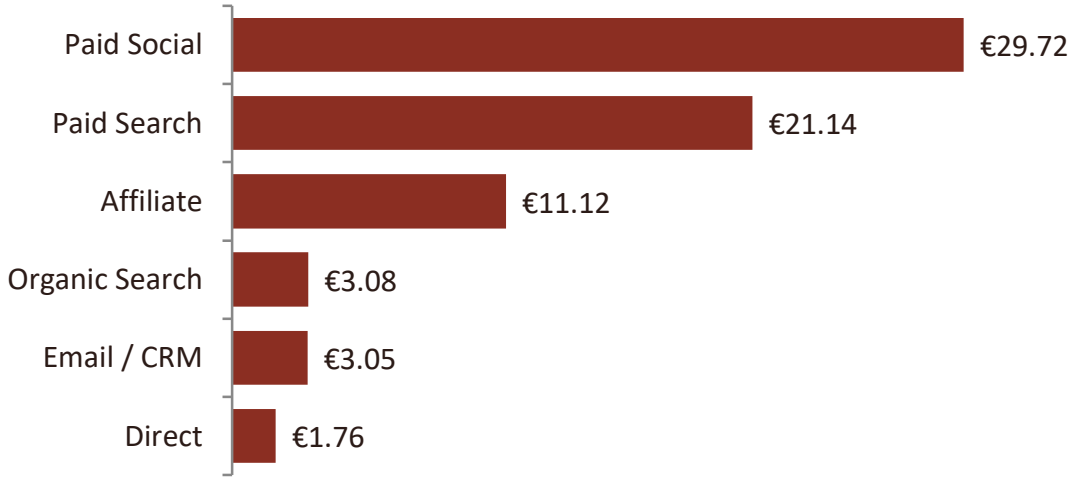

Dataset in view: 2,200 customers · 5,873 orders · €640.42K net sales · €29.88K marketing cost · 2024–2025 · values in euros

Acquisition Overview: questions answered

Visual	Business question it answers	What the data shows
KPI cards	How large is acquisition, and what does it cost?	2,200 customers at €13.58 marketing cost each; €640.42K net sales; €127.65K contribution margin.
Total Customers by year and quarter	Is customer volume growing, and when does it peak or slow?	Climbs from ~300 (Q1 2024) to ~880 (Q3 2025), then drops to ~680 in Q4 2025.
Marketing Cost vs Contribution Margin (bubble)	Which channels buy margin cheaply and which are expensive?	Organic, Email/CRM and Direct sit top-left (high margin, tiny cost). Paid Social sits far right at €15.7K cost for €17.8K margin.
Acquisition Channel Distribution (table)	How do channels compare on volume, sales, cost, margin and revenue per customer?	Paid Social leads volume (527); Email/CRM has the highest revenue per customer (€315.17).
Net Sales by channel (bar)	Which channels drive revenue?	Paid Social €147K, Organic €135K and Paid Search €121K lead; Affiliate (€68K) and Direct (€66K) trail.

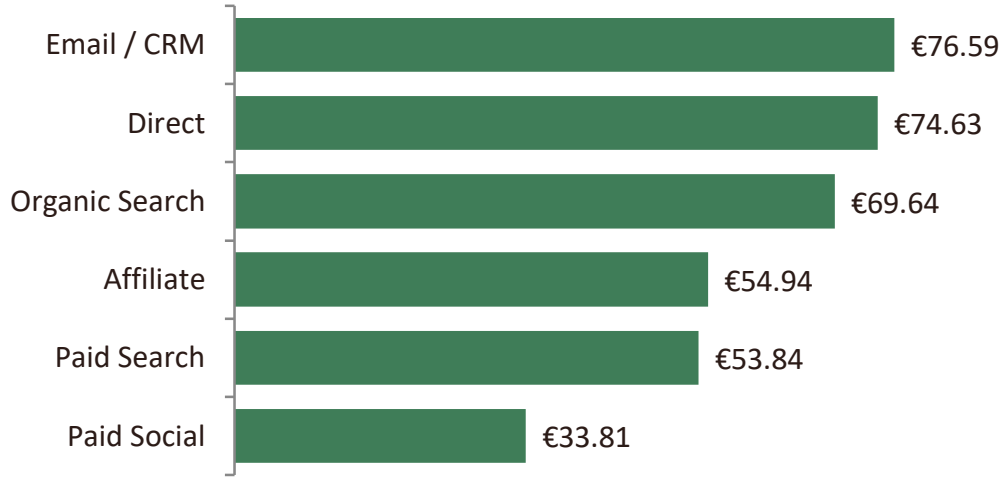

Cost and margin per customer, by channel

Marketing cost per acquired customer (€)

Paid Social costs about €30 per customer, nearly 10x Organic Search or Email/CRM (about €3).

Contribution margin per acquired customer (€)

Email/CRM, Direct and Organic return €70–77 margin per customer; Paid Social returns only €34.

52% of marketing cost goes to Paid Social, which brings 24% of customers and 14% of margin.

17x gap in cost per customer between Direct (€1.76) and Paid Social (€29.72).

Acquisition Overview: stakeholder scenarios

CMO / Head of Marketing

DECISION

How to split the marketing budget across six channels.

WHAT THE PAGE SHOWS

Paid Social takes 52% of the €29.88K spend yet returns only €33.81 margin per customer.

ACTION

Set cost-per-customer ceilings by channel; move incremental budget toward Email/CRM and organic content.

Performance Marketing Manager

DECISION

Which paid channels to scale, tune or pause.

WHAT THE PAGE SHOWS

Paid Search costs €21.14 per customer vs €29.72 on Paid Social, with similar revenue per customer (€294 vs €279).

ACTION

Move to value-based bidding and tighter audience targeting on Paid Social.

Finance / FP&A

DECISION

Does marketing earn its keep, and how should it be forecast?

WHAT THE PAGE SHOWS

Marketing is 4.7% of net sales: €13.58 acquisition cost per customer against €58.02 margin per customer.

ACTION

Track margin-to-cost by channel monthly and explain the Q4 2025 dip (about 23% below Q3).

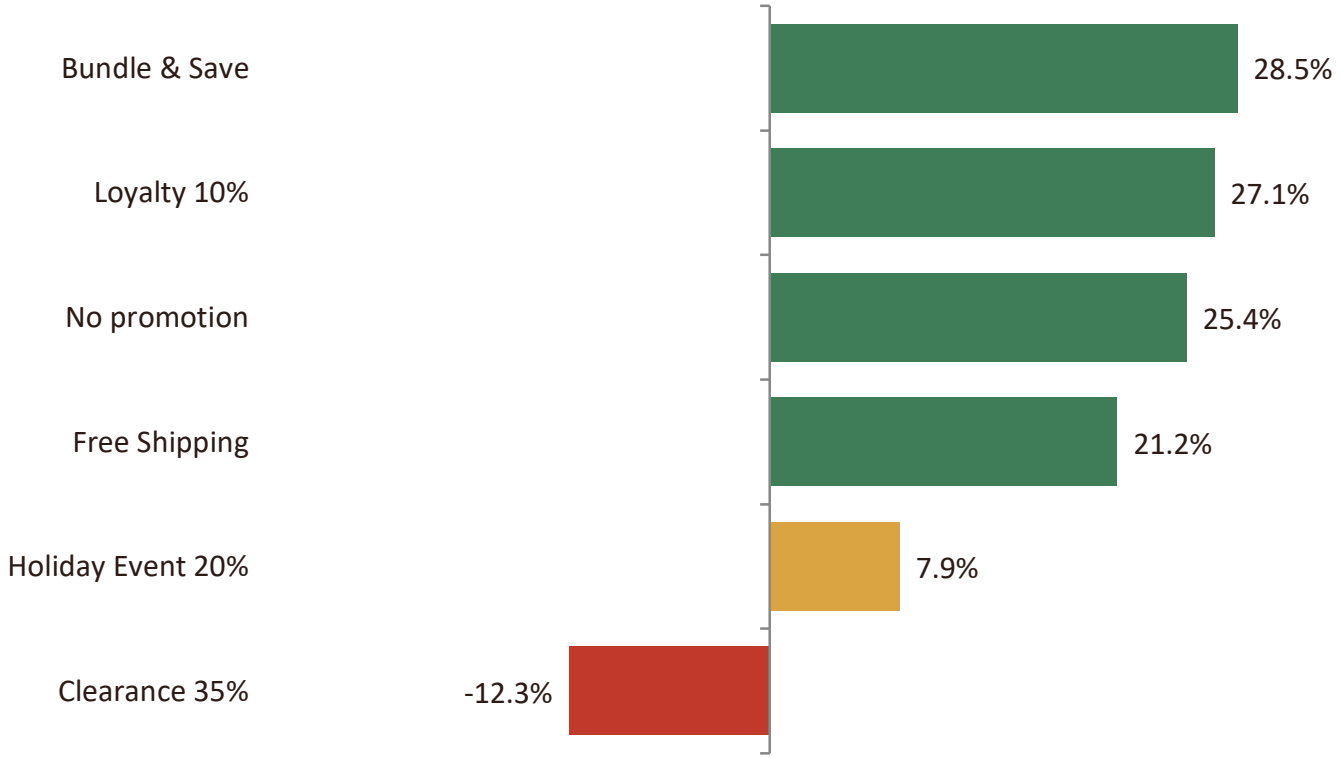

Watch-out Q4 2025 customer volume is about 23% below Q3. Confirm seasonality vs incomplete data before drawing conclusions.

Campaign Performance: questions answered

Visual	Business question it answers	What the data shows
KPI cards	Is the business profitable after promotions and marketing?	19.93% contribution margin on €640.42K net sales across 5,873 orders; €29.88K marketing cost.
Net Sales and Contribution Margin % by campaign	Which campaigns sell most and which keep their margin?	Welcome 15% (~€76K) and Bundle & Save (€74K) lead sales. Bundle & Save earns 28.5% margin; Clearance 35% earns −12.3%.
Campaign Cost Distribution (table)	What does each campaign cost and return, in € and %?	Marketing cost is 3.4–6.9% of campaign sales; Clearance has the highest cost share (6.91%) and is loss-making.
Marketing Cost vs Margin by campaign and objective	Which objectives deliver margin for the spend?	Basket growth: ~€2.5K cost for €21K margin. Acquisition: ~€7.4K cost for ~€9K margin.
Net Sales by Promotion Objective	Which business goals do promotions serve, and how much do they sell?	Acquisition €76K, Basket growth €74K and Retention €74K lead; Inventory clearance is smallest (€23K).
Marketing Cost by campaign	Where does the promotion budget go?	Welcome 15% takes €7.4K (about a quarter of spend); VIP Private Sale takes only €0.4K.

Promotions trade margin for volume

Contribution margin % by campaign

Green: 20% or more. Amber: 0–20%. Red: negative. Welcome 15% (~11–12%), Weekend Flash 25% (~1–2%), Summer Event 15% (~21%) and VIP Private Sale 12% (~23%) are read from the combo chart because the table was scrolled.

25.4% vs 16.7%

margin with no promotion vs across all promoted sales (derived).

−12.3%

Clearance 35%: €22.5K net sales, −€2.8K contribution.

28.5%

Bundle & Save: best margin on the lowest cost share (3.36%).

~25%

of marketing cost goes to Welcome 15% (€7.4K), the largest line.

Campaign Performance: stakeholder scenarios

Pricing & Promotions Manager

Scenario: Building next season's promotion calendar.
Insight: Promoted sales earn 16.7% margin vs 25.4% with no promotion.
Action: Set a margin floor and cap discount depth before approval.

Merchandising & Inventory Planner

Scenario: Clearing excess stock.
Insight: Clearance 35% sold €22.5K but ended at −€2.8K contribution.
Action: Treat deep clearance as a write-down; bundle slow movers instead.

Finance / FP&A

Scenario: Approving promotion budgets.
Insight: Bundle & Save returns ~€8.50 margin per €1 spent; Welcome 15% about €1.20.
Action: Require a minimum margin-per-€ before a campaign is funded.

Growth & Acquisition Lead

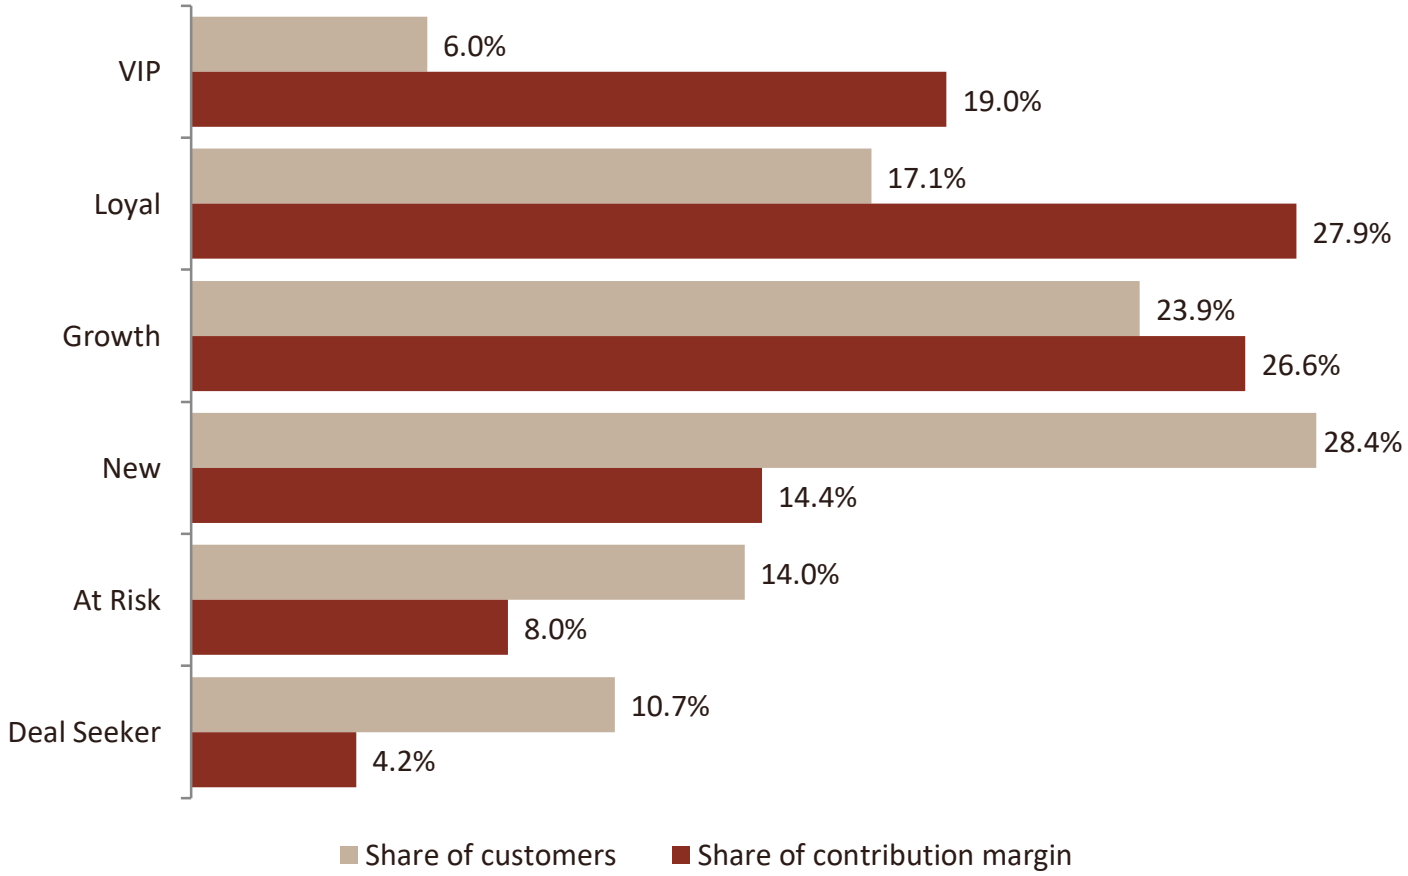

Scenario: Designing the new-customer offer.
Insight: Welcome 15% is the largest cost line (€7.4K) for ~11–12% margin.
Action: Test a free-shipping welcome offer (21.2% margin at 4.05% cost).

Customer Value: questions answered

Visual	Business question it answers	What the data shows
KPI cards	What is a customer worth, per order and in total?	€291.10 revenue and €58.02 margin per customer; AOV €109.05; 2.7 orders per customer (5,873 / 2,200).
Net Sales and Contribution Margin % by segment	Which segments drive sales, and which keep their margin?	Loyal (€166K) and Growth (€165K) lead sales; VIP has the best margin (25.9%), Deal Seeker the worst (9.3%).
Customer Lifecycle Progression	How does the customer base evolve after acquisition?	2.2K at acquisition, 0.9K developing (0–3 months), 1.2K early repeat (4–6), 0.7K at 7–12 and 0.1K at 13–18 months.
Customer Segment Distribution (table)	How big and how valuable is each segment per customer?	VIP: 131 customers, €716.65 revenue and €185.49 margin each. New: 624 customers, €160.18 and €29.44.
Acquisition Channels by segment (heatmap)	Which channels bring which kinds of customers?	Email/CRM brings 48 of 131 VIPs; Paid Social brings 89 of 235 Deal Seekers but only 8 VIPs.

Value is concentrated in a few segments

Share of customers vs share of contribution margin, by segment

6% → 19%

VIP customers are 6% of the base but 19% of contribution margin and 15% of net sales.

47% → 73%

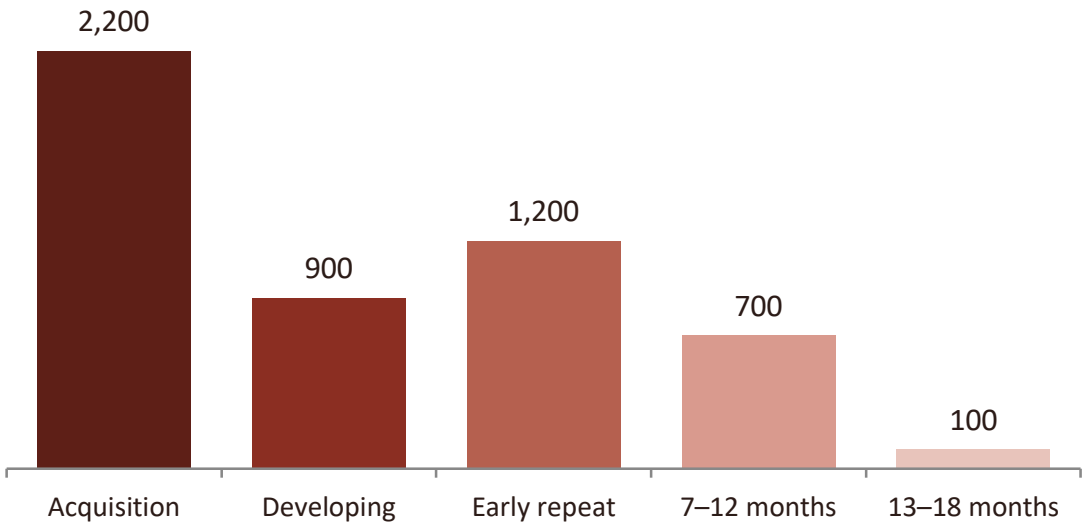

Loyal, Growth and VIP together hold 47% of customers and 73% of margin.

25% → 12%

Deal Seeker and At Risk are 25% of customers but 12% of margin; Deal Seekers earn only 9.3% margin.

Lifecycle drop-off and channel quality

Customers by lifecycle stage and months since acquisition (approx.)

Acquisition and Developing fall in months 0–3; Early repeat in months 4–6. Most customers sit at the acquisition stage (2.2K). Only 0.7K remain active at 7–12 months, so the 4–6 month window (1.2K early repeaters) is the key moment to lock in repeat purchase. The 13–18 month tail covers only the earliest cohorts.

Share of each channel's customers that are VIP or Deal Seeker

Channel	Customers	VIP %	Deal Seeker %
Email / CRM	328	14.6%	5.5%
Direct	216	7.9%	6.0%
Organic Search	477	6.5%	5.0%
Affiliate	241	4.1%	20.3%
Paid Search	411	4.1%	10.2%
Paid Social	527	1.5%	16.9%

Email/CRM is the best source of VIPs (14.6% of its customers). Paid Social (1.5% VIP, 16.9% Deal Seeker) and Affiliate (20.3% Deal Seeker) skew toward bargain hunters.

Customer Value: stakeholder scenarios

CRM & Retention Manager

Scenario: Win-back and repeat-purchase journeys.
Insight: 307 At Risk customers (14% of base) still hold €58.4K in net sales.
Action: Trigger win-back early and track At Risk to Loyal conversion.

Loyalty & VIP Programme Owner

Scenario: Protecting the highest-value customers.
Insight: 131 VIPs (6%) spend €716.65 each and give 19% of margin.
Action: Add early access and service perks; monitor VIP churn monthly.

Acquisition & Insights Lead

Scenario: Targeting quality over volume.
Insight: Paid Social and Affiliate bring 59% of Deal Seekers; Email/CRM brings 37% of VIPs.
Action: Aim paid channels at Growth/Loyal-like audiences; scale CRM sign-ups.

Executive Leadership

Scenario: Managing value concentration and growth.
Insight: Loyal, Growth and VIP are 47% of customers and 73% of margin.
Action: Add segment KPIs (VIP count, At Risk share) beside net sales.

Business scenarios across all three pages

Stakeholder	Business scenario	Pages	Question they can now answer
CMO / Head of Marketing	Annual budget and channel mix	1, 3	Which channels deliver customers worth keeping per € spent?
Performance Marketing	Bid, targeting and creative optimisation	1, 3	Which paid channels attract Growth/Loyal vs Deal Seeker customers?
Pricing & Promotions	Promotion calendar and discount depth	2	Which mechanics protect margin and which erode it?
Merchandising & Inventory	Stock clearance and bundling	2	Is clearance worth its margin cost?
Finance / FP&A	Budget approval, forecasting, ROI	1, 2	What does each € of marketing and promotion return?
CRM & Loyalty	Retention, win-back and VIP programme	3	Who is at risk, who is worth protecting, and when?
Executive / E-commerce Director	Growth strategy and KPI setting	1, 2, 3	Is growth profitable, and how concentrated is value?

Priority actions and expected impact

	ACTION	OWNER	TRACK
1	**Rebalance channel budget toward higher margin-per-customer channels**	CMO, Performance Marketing	Cost and margin per customer by channel
2	**Add margin guardrails to promotions; review Clearance 35% and Weekend Flash 25%**	Pricing & Promotions, Finance	Contribution margin % by campaign
3	**Redesign the Welcome offer (largest cost line, ~11–12% margin)**	Growth & Acquisition Lead	Margin per € spent on Welcome (now ~€1.20)
4	**Launch At Risk win-back and VIP protection journeys**	CRM & Loyalty	At Risk share (14%), VIP count (131)
5	**Add channel-by-segment quality metrics to the monthly scorecard**	Analytics, Marketing	VIP % and Deal Seeker % by channel

SYNTHESIS

Data notes to validate before presenting

Quarterly customer chart

Bars sum to about 5K vs 2,200 acquired customers, so it likely shows active customers per quarter. Confirm the definition.

Q4 2025 dip

Volume is about 23% below Q3. Confirm seasonality vs incomplete data.

Contribution margin definition

Confirm whether it is before or after marketing cost; per-€ ratios depend on it.

Values marked ~

Welcome, Weekend Flash, Summer Event and VIP Private Sale were read from charts. Export exact figures.

Email/CRM attribution

VIP share may reflect existing customers being emailed. Compare first-touch and last-touch.

Lifecycle tail

13–18 month counts include only the earliest cohorts, so drop-off is overstated. Compare by cohort.

Derived metrics (per-customer cost and margin, margin shares, return ratios) are calculated from dashboard figures and are not dashboard measures.
